

Submitter: Stella Ganfield

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB2004

Ranked choice voting needlessly complicated the voting system, leading to voter confusion, lower turn outs, whilst allowing for slower results and increased irregularities and most importantly undermining our “one person, one vote system”.

“Insanity is doing the same thing over and over and expecting different results.” - famous aphorism not coined by Albert Einstein as believed but at a 1980’s AA meeting.
