

Submitter: Larry Miller  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: HB2004

I encourage the passage of HB2004.

Rank Choice Voting allows for increased choices of those people seeking to fill elected offices. Candidates that may have the skills, knowledge and commitment, but not the finances. We could look forward to a time where we do more than picking between one or two candidates with the resources to "win". Not the person we would like to see win, but are afraid to vote for because it means increasing the odds of someone we really don't want to win, winning.

Our current system doesn't work in the best interest of everyone. Instead it forces us to chose from those who have the money and connections to win.

Please choose to provide some positive changes to our current system for selecting our leaders and representatives.

Please vote to pass HB 2004.

Thank you for considering the long term opportunities provided by Rank Choice Voting.

Larry Miller
