

Submitter: Calista Songstad

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2278

Vote No on HB 2278

Parents of 6 month old babies have usually not discovered what if any allergies a child has or adverse reactions they may have to medicine. These types of interventions are best done in a doctors office where medical staff is available and trained for an emergency and the child's medical records are stored.
