

Submitter: Nicole De Graff
On Behalf Of:
Committee: House Committee On Education
Measure: HB2281

I oppose this bill on several grounds.

One, this could potentially lead to false claims of discrimination which is a serious issue, between students and or teachers who do not adhere to radical gender ideology and their own rights to privacy and religion.

Two, we have HR staff, 504 & Title IX coordinators already. Schools should not be responsible for investigating unintended gender identity issues that could change on a whim. I have already seen multiple cases of individuals who have or are currently de transitioning.

Third, Oregon kids have the federal and state discrimination laws that are sufficient and we need to focus on getting kids to learn to read.

Please vote no.
