

Submitter: Patsy Roberts
On Behalf Of: CBIRT
Committee: Senate Committee On Human Services
Measure: SB420

It is important to students with a brain injury, that they receive the educational services they need to help them be successful in school.

TBI is very different from other eligibilities as it can't always be seen. It is a neurological issues, caused by a extreme blow to the head.

If we don't offer these people the services they need to be successful they will continue to fail throughout their years.

We need to support and serve these folks!
