

To whom it may concern:

My son, Joaquin, is currently in the pre-k program at Adelante Mujeres. He was diagnosed with Autism when he was a toddler. Due to this, he needs consistency in his schedule. A couple years ago, he was able to attend a summer program via Washington County at Adelante Mujeres and I was looking forward to that repeating again this summer. He loved seeing all his friends and teachers and it was great seeing him continue to grow academically, socially and emotionally.

This fall will be his last year at Adelante Mujeres (he will attend Kindergarten in fall 2023) and this will greatly help make it easier for him to transition to kindergarten this fall since he will not have a big gap between summer and kindergarten.

Everyone at Adelante Mujeres are all trying their best to care for and educate the pre-k children. I am truly blessed to have a great team of passionate preschool teachers caring and educating my son.

Thank you,
