

Submitter: Liban Satu

On Behalf Of:

Committee: House Committee On Early Childhood and Human Services

Measure: HB2495

We are all human beings with age we shall require quality care and looking forward to have a well trained society with dignity, and understanding the challenges that the elderly population are going through.

As always motivation will keep one go extra miles, the love and passion for this caregiving job goes along hand in hand with comfortability and focus with what you are doing.

The question is are you comfortably paying your mortgage or rent and bills? are you able to hire enough employees and pay them accordingly to the guidance of the labour laws?

Is the provider able to take a vacation and relax. Off late we have noticed it has become a challenge to discharge clients from Hospital as the Pay rates are decreasing, the more they stay in hospital the more money is being paid compared to the Foster home.

Case managers are acting tough on providers, threatening to take away the license while the providers are struggling with bills and behavioral clients. The responsibility should be a Win win for all. Good care for clients, Good pay for providers and smooth super vision for case managers.

I agree some providers need to improve on their caregiving jobs and having some measures and actions to train and retrain them is welcomed. To my conclusion yes I support.
