

Submitter: Kayla Fredlund  
On Behalf Of: Self and DeVos Dairy  
Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water  
Measure: HB2616

Dear Chair Helm, Vice-Chairs Hartman and Owens, and members of the committee,

My name is Kayla Fredlund and I'm excited to write in support of HB 2616.

As a responsible consumer, I want to make sure that Oregon's dairy industry follows the best possible standards across the board, especially around raw milk. Unfortunately, Oregon's raw milk regulations are falling behind — it is time to revisit and upgrade our outdated raw milk laws.

For years, I've struggled with malnutrition from not getting enough fat-soluble vitamins, especially those found in milk. I cannot digest pasteurized milk, especially when organic milk is only available as highly-pasteurized, making it even more damaging to my digestive system. When I have had access to unpasteurized milk from local farms, I have been able to digest it without issues and immediately notice improvements in my wellbeing. Since these local farms are legally prohibited from advertising, I have had to work hard to find them.

If passed, HB 2616 will ensure that Oregon producers are able to meet the growing demands for raw milk in our state safely and effectively, by implementing nationally-recognized testing, safety and risk mitigation measures and giving cow dairies the same opportunities that goat and sheep dairies already have.

For licensed dairies, raw cow's milk is currently off the table. Oregon allows the retail sale of raw milk from sheep and goats, but not from cows — no other state makes this distinction in the retail market. It's time to fix this discrepancy and improve the safety, testing and training standards for raw milk production across the board — whether you're milking goats, sheep or cows.

For smaller licensed-exempt producers, HB 2616 offers critical upgrades as well. If passed, this legislation will give small cow dairies new possibilities to grow, expand their business and reach more consumers in this growing industry. HB 2616 will also allow small producers more flexibility in how they get their products to their consumers — eliminating the burdensome requirement that sales transactions take place on-site. These small, common-sense upgrades will help both Oregon's farmers and the customers they serve.

As a consumer myself, I am thrilled to see this bill before your committee. If passed,

this bill will help me continue to obtain affordable raw milk that greatly supports my health and recovery from issues presented by malnutrition.

Oregon's raw milk policies are out of date and it's time for a change. This legislation will raise the raw milk standards in Oregon and ensure better transparency, access and accountability across the board.

I urge your support for HB 2616.

Thank you,

Kayla Fredlund
