

Dear Chair Helm, Vice-Chairs Hartman and Owens, and members of the committee,

My name is Teagan Moran and I'm excited to write in support of [HB 2616](#) so that we can make the changes necessary to support a vibrant and resilient local/regional food economy and system.

As a responsible consumer and farmer I want to make sure that Oregon's dairy industry follows the best possible standards across the board, especially around raw milk. Unfortunately, Oregon's raw milk regulations are falling behind — it is time to revisit and upgrade our outdated raw milk laws.

I have sought out local raw milk for over 10 years, and in that time have seen the farms I buy from struggle to keep their business afloat amidst the regulations and restrictions that prevent them from running a viable business. The limitations make a small scale raw dairy operation, no matter how responsible, struggle to stay in business. When I am lucky enough to have a local farm willing to navigate these challenges I have been able to supply my family with high quality and nutritious raw milk, which is the best fit for our family dairy needs.

If passed, HB 2616 will ensure that Oregon producers are able to meet the growing demands for raw milk in our state safely and effectively, by **implementing nationally-recognized testing, safety and risk mitigation measures** and **giving cow dairies the same opportunities that goat and sheep dairies already have.**

For licensed dairies, raw cow's milk is currently off the table. Oregon allows the retail sale of raw milk from sheep and goats, but not from cows — no other state makes this distinction in the retail market. It's time to fix this discrepancy **and** improve the safety, testing and training standards for raw milk production across the board — whether you're milking goats, sheep or cows.

For smaller licensed-exempt producers, HB 2616 offers critical upgrades as well. If passed, this legislation will give small cow dairies new possibilities to grow, expand their business and reach more consumers in this growing industry. HB 2616 will also allow small producers more flexibility in how they get their products to their consumers — eliminating the burdensome requirement that sales transactions take place on-site. These small, common-sense upgrades will help both Oregon's farmers and the customers they serve.

As a consumer, farmer, and regional food systems advocate myself, I am thrilled to see this bill before your committee. If passed, this bill will help us all to build a resilient and vibrant local food economy.

Oregon's raw milk policies are out of date and it's time for a change. This legislation will raise the raw milk standards in Oregon and ensure better transparency, access and accountability across the board.

I urge your support for HB 2616.

Thank you,

Teagan Moran
