Talking Points

- Chair Golden, Vice-Chair Girod, and members of the committee — my name is Sheila McKelvie and I'm writing on behalf of Oregon raw milk producers and my farm in Lakeview, Or.
- I have owned 2 - 3 producing dairy cows as per the Oregon law, wishing to provide people with healthy, safe raw milk. I have not been able to achieve this goal as it seems counterintuitive that I should expose my farm and cows to biohazards of people coming onto my farm from who knows where bringing who knows what on their shoes. It would be much cleaner and safer to export my product to a farmers market. Additionally, myself and my whole extended family have used raw milk for 60 years, before the current technology we have today and we were never injured or harmed by raw cow milk.
- I'm writing today in support of SB 507, which will provide much needed improvements and upgrades to Oregon's Farm Direct Marketing Law first enacted in 2011.
- SB 507, with the forthcoming amendment, will:
 - Include entities that assist small producers by aggregating, delivering, and assisting with the sale of FDML eligible products, into the FDML regulatory framework.
 - Add steam canning and freeze drying to eligible processes that can be used for the production of preserves, jams, and canned fruit and vegetables.
 - Improve consumer access to FDML products by allowing additional sales opportunities through consignment.

- Include certain herbal tea blends, juices, and maple syrup as eligible products under OR's FDML.
- I am excited to see the changes proposed in SB 507. With these changes, I'll be able to add valuable and nutritious food to our available farmers market in Lake County.
- Our local food systems have increased demands that we must start to address — SB 507 will help Oregon farmers and producers continue to sell safe, fresh produce directly to their consumers in the modern era.
- With opportunities to increase revenue through additional safe, value-added products like healthy, safe raw milk and the opportunity to expand marketing and delivery avenues, SB 507 will help both Oregon's small producers and the customers they serve.
- Oregonians are demanding more local, sustainable and fresh products accessible in their communities. With the boom in farmers markets over the last decade, and the expansion of food hubs and food delivery systems, it's time to ensure Oregon's Farm Direct Marketing Law keeps pace.
- The improvements in the legislation before you will help improve upon our robust local food system, expand producers' sales and income opportunities, and give everyone a clearer regulatory framework about what foods can and cannot be sold farm-direct.
- Countless farmers and consumers benefit from this model and we support the continuation and modernization of this important process.
- I urge your support for SB 507.
- Thank you for your time and consideration.
