

Submitter: James Pritchard

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB507

Hello,

As an avid consumer of big leaf maple syrup and I urge you to include this promising new product in the Farm Direct bill. Western Oregon has an abundance of big leaf maple trees and tapping them is a sustainable use with hardly any negative impact. Including big leaf maple syrup in the Farm Direct bill will markedly improve the ability of farmers to produce syrup as a crop and market it to consumers like me, making a significant economic impact.

Please support this proposed change in the Farm Direct bill.

Thank you for your consideration.
