

Submitter: Jeffrey Dose
On Behalf Of:
Committee: House Committee On Rules
Measure: HCR12

As a citizen and resident of Douglas County, I strongly support passage of HCR 12. I have known both Frank and Jeanne Moore for over 50 years. As a retired Fisheries Biologist who worked for over 30 years in the Umpqua as the Fisheries Program Manager for the Umpqua National Forest, I found support and inspiration from both Frank and Jeanne to continue to use my best efforts in utilizing a solid, scientific basis for my work. I worked with Frank on many actions regarding the conservation of the North Umpqua River, both in my official agency capacity and as a friend and concerned citizen. While Frank was a kind, humble, and caring person, he could be a tenacious advocate for what he believed in. In my view, both Frank and Jeanne believed in the inherent goodness of people and the conservation of his beloved North Umpqua River. My time spent with Frank was always entertaining, often informational, and always inspirational. There are many, many other people whom I know that share these thoughts. Please pass HCR 12 in his memory, a truly larger-than-life person who was influential in many of the things that make Oregon special. Thank you.
