**Statement for the Record
Committee
January 30, 2023
HB 2395 Opioid Harm Reduction**

Chair Nosse, Vice Chairs Nelson, and Goodwin and members of the committee, please accept this statement for the record on behalf of Dr. Alex Skog, the President of the Oregon Chapter of the American College of Emergency Physicians. OR-ACEP is a medical society that has represented physicians specializing in emergency medicine since 1971 and its members share a commitment to improve emergency healthcare for all Oregonians.

OR-ACEP supports HB 2395 and would like to thank Rep. Dexter's for convening the Opioid Harm Reduction Coalition to develop strategies to address the epidemic. This bill addresses the key components to attack the opioid epidemic head-on with the critical element of establishing funding to put opioid antagonist kits directly in the hands of those who need them.

From the vantage point of treating Oregonian's every day in the emergency department, the past few years have demonstrated a complete transformation of the opioid epidemic. No longer are people overdosing on opioids prescribed by medical providers but they are all too frequently unknowingly taking pills that they think are prescription medications and being poisoned by laboratory derived synthetic opioids such as fentanyl and an ever-growing list of even more powerful opioid derivatives. From the straight-A teenager I took care of who thought the Xanax he took at a party would be the same pill as his family member was prescribed to the father taking what he thought was oxycodone from a friend for a back injury, I see Oregonians regularly poisoned by supercharged synthetic opioids thought to be prescription medication.

The Opioid Harm Reduction package pivots our efforts to attack today's epidemic head-on by addressing this new reality. Short acting opioid antagonists, like naloxone, have been shown to be incredibly safe and effective in reversing opioid poisoning. As an emergency medicine physician there are three particular ways that this new package of legislation will save Oregonian's lives as soon as it is

implemented. First, it will get naloxone into the community where the poisonings are happening. Naloxone must be omnipresent to be able to be administered to victims in the minutes between the first signs of an opioid poisoning developing and the rapid progression of the poisoning to death. Second, this package provides the vital funding to place naloxone in the hands of Oregonians at risk. A single naloxone kit costs \$127 at the pharmacy down the street from my emergency department. Naloxone prescriptions are worthless for my uninsured patients at this price. This legislation allows for me to put naloxone kits directly in the hands of my patients. Lastly, this bill legalizes and removes stigma behind fentanyl test strips. For those who do use any illicit substance, fentanyl test strips save lives. Any barriers to distribution of fentanyl test strips directly endangers the lives of thousands of Oregonian's daily and further propagates the current crisis.

The Oregon chapter of ACEP has also been active partners in supporting and implementing the Emergency Department Information Exchange, supporting legislation to improve the Prescription Drug Monitoring Program and naloxone prescriptions, serving on opioid task forces at the state and national level and prioritizing appropriate patient care. We appreciate the commitment of Rep. Dexter, legislators and other partners to address the opioid epidemic. OR-ACEP is pleased to be a resource and to advocate for improved and appropriate care for patients.

We urge the legislature to move forward judiciously yet expeditiously in passing this package of life saving legislation.
