

Submitter: Mark Cosby

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB521

Hello committee of Education...

I'd hope you could see clear to vote against taking the peoples kicker.

2 yr ago the legislature voted to lower education standards.

While Democrats have enjoyed the majority in the legislature it has had record revenues (to what end ?)

I see we will exceed \$500 Million to do remodels on the capitol and earth quake proof it...

In 2015 the said replacement cost for the Capitol was said to be \$17 Million.

Yeah it is a nice building but this seems most unreasonable as committee rooms are small and people set in over flow rooms.

ADA and other updates since 1938 might have been addressed for a whole lot less than \$500 Million +.

Citizens voted limitations on how much excess revenue the Legislature could keep. (will you override that known will)?

And for me... to put a Emergency Clause on any Legislation to keep the People from over riding the will of the Legislature through

initiative process shows a special kind of contempt should you pass this legislation.

I now watch the process.
