

## **Subject: (HJR 5)**

I am writing this in support of HJR 5

I was raised on a farm, where we raised what we ate. It is a way of life that I still believe in today, that is fast fading from the world today. It is sad that so many people today don't realize where the food they eat comes from.

I hunt and fish, so I know that the meat I eat is the best and healthiest I can get. I try to purchase most of my garden grown fruits and vegetables, from local farmers markets so I can do my own canning for the best I can get.

HJR 5, Ensures that current and future generations of Oregonians have the ability to fish, hunt, harvest, and gather to sustain themselves and their families. It protects Oregonians from an outright ban on the ability to fish, hunt, harvest and gather. It allows for the reasonable regulation of these activities through the Legislative Assembly, citizens of the State, and state agencies.
