

Submitter: Zachary Leshner

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB2095

This bill would provide the opportunity for municipalities to enhance safety for pedestrians and bicyclists. There are many roads in my city where drivers travel well above the posted speed, and this bill would be an insufficient but necessary step for improving the ability of myself and Oregonians like me to move around our environments without being killed by a driver.

I would also encourage legislators to consider removing the requirement that law enforcement officers review all photographs sent in by a camera, as this is an unnecessary expense that will slow adoption of this tool.
