

Submitter: Ezra Pero
On Behalf Of: Oregon Rowing Unlimited
Committee: House Committee On Judiciary
Measure: HB3006

This new law is a significant detriment to a flourishing sport in Oregon. The requirement to wear a life jacket while rowing is very unacceptable. The rowers that go out on the water every day are trained to tread water, not only that but there is always a licensed professional close behind on another boat. The lives of children performing on water are not in any threat and changing the law will cause far more harm than good.
