

Submitter: Calista Songstad

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB718

Please vote Aye,

We should never punish a person for things that are out of their control, such as the weather. Current law does not protect those individuals who cannot have water in a given year due to drought or those who choose to skip a cycle due to low water or the ability to have enough water to get through a whole grow. Please protect those who have worked hard for their assets and who cannot or choose not to grow during a drought by giving them the peace of mind that their asset is protected.
