

Submitter: Joseph Thompson

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3006

Continue with public outreach and education. Teach people the dangers. Simply creating a law does not mean that people will know it exists any more than the danger itself, and it will just be another minor infraction that will occur through ignorance. It is often illustrated at our local parks along the Albany shoreline that individuals don't pay attention. The largest local influence that has seemed to make a difference is the PFD lending stations supported by the fire department. Please put support where it is most effective, not into more needless legislation.
