

Submitter: Josh Christenson

On Behalf Of:

Committee: House Committee On Rules

Measure: HJR5

HJR 5 protects our food independence. The virus and previous natural calamities have proved that retailers may not have what we need. We campers and outdoorsmen know that nature can be our food shop. We succeed because generations before us know where to obtain food. I'm proud to discover food in Oregon in a natural way.

Please pass HJR 5 and let Oregonians vote for a Right to Food. Mushrooms, berries, fish, and wildlife should be available to future generations when other food is scarce. This amendment safeguards these rights.
