

Submitter: Travis Younger

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB767

Why would you limit an alternative to public schools? Tax payers and the children of our community should have options for education. Our public schools are failing and there is no alternative for many families. Why not let competition in education exist? Open competition is the best way to improve any model. This seems like a bill in the best interest of the teacher unions and not of the children in our state or the tax payers depending on an educated population for our future.
