

Submitter: Ruanne Nunyara
On Behalf Of: the health of our whole community
Committee: Senate Committee On Education
Measure: SB767

Any system that limits its own diversity is bound to lose energy, life, creativity, new options when the old disappear and basically not be as healthy as a system with the most diversity that can be found. This is true of all life in all areas and especially in our very fear-based culture that is strangling itself with more and more restrictions. Please let our state education come back to life and serve the people with as much diversity as possible. Oppose this bill. Thank you.
