

Submitter: Ronald Wiggins

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB767

This Senate bill 767 is not in the public's interest or in the interest of better education. Charter schools have always been an improvement above the traditional public schools. I have 5 grown children, 4 educated in public schools and 1 educated in a charter school K-8 up until high school. The freedom of parents to choose the best for their children's education is at the bedrock of a free society. This bill ONLY restricts that freedom further by making the school district the deciding entity in the future of a charter school. And The school district has only one interest and that is reducing their competition in the education marketplace. If they can't provide what a charter school provides, they should figure out why and change, but NOT be enabled to throttle a charter school doing a better job.

Very sincerely,  
Ronald Wiggins
