

Submitter: ML ML

On Behalf Of:

Committee: House Committee On Rules

Measure: HJR5

Wildlife needs to be protected. Animal populations due to human activity, habitat loss, and climate change have dramatically decreased in the last few decades. The government needs to prevent harm to wildlife, and thus designating hunting/fishing as a constitutional right should be opposed. Hunting and fishing should continued to be managed as well as decreased to prevent greater harm to the environment and wildlife.
