Committee: Joint Committee On Transportation
Measure: HB2137

RE: HB 2137

Dear Oregon Senate and House Members:

As a resident of Salem, Oregon, since 1979 and a co-owner of a farm in Hubbard, Oregon, I am opposed to HB 2137.

We do not need a third bridge. Nor do we need a new Willamette River Bridge Task Force.

First, a new bridge means encouraging more cars and thus air pollution. Second, another bridge means more takeover of farm land. And third, this is just more bureaucracy spending more money to study something already examined and something already with an established governmental process to determine transportation needs of cities and regions.

Please oppose this unnecessary bureaucratic entanglement.

Thank you
