Committee: Joint Committee On Transportation

Measure: HB2781

I am opposed to this bill which is drafted to implement a strategy to facilitate increased truck and automobile traffic at the expense of property owners. This is such a repressive tax plan! Residents who may or may not drive should not be subjected to additional taxes to support the fossil fuel addictions of their neighbors and representatives. This is not a proposal to address the very pressing need for mass transit options to provide for our community members and protect our commons, our air, land and waterways, but a desire of a few who see time as money and want to make more of both.
