

Submitter: Philip Kling

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB767

I live in a tiny school district that is currently reviewing a public charter school proposal that wants sponsorship by our district to set up a huge brick and mortar charter school in a neighboring district. They do not want to offer a school in our district, just want to use us as the sponsor. As current law reads they can do this with just giving notice to the district they want to set up in. This seem very wrong. Districts where brick and mortar public charter schools are established should be able to give or deny approval for schools in their district. Please close this loophole and pass SB 767.
