

Submitter: Stacie Hall

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB70

Please do not open up more farm land to housing. At this time, the USA needs to retain all the farm land possible to enable our country to feed itself. Reclassifying land to allow housing to be built does not make sense in the long run. This is a short sighted bill that will harm our state and country. We should be refocusing our efforts on helping farmers and preserving the farm land. Thank you for considering this perspective.
