

Submitter: Heidi Jacobson

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

There are few, if any, positive long term outcomes and testimonies of individuals who have participated in conversion therapy. It has caused psychological, spiritual, and physical harm to many that have been either forced or coerced receiving it. I would urge anyone in favor of opposing this bill to consider the societal discourses that contribute to the matter and their homophobia rather than trying to force individuals to change an integral part of their life through these appalling means.
