

Submitter: Tiffany Ingram
On Behalf Of:
Committee: House Committee On Revenue
Measure: HB2089

I believe in this bill with all my heart and because of these programs and the one 10 program it will help people that are in recovery as well as I am to get back on their feet to feel like there were accomplishing something that we that somebody believes in us enough to give us a chance to help us out in our dire time of need to show us it's okay that we're worth it and that we can do better and be better people and that people actually care out there and they're willing to help and to show us that people can change and people can be good and I just hope that everybody can understand that this is a good thing this is not people asking for help from the government like welfare or stuff like that or that's trying to cheat the government because I know and I understand people do that but a lot of people in recovery are still struggling everyday if not just fighting off addiction but finding stable housing which is something that I was able to do with the help of this type of Bill and with people that cared and wanted to help I was in my van and now I'm not and I know that this can really help people out and I am a living person that it has helped and I believe in myself again and I feel like I'm accomplishing something they are working or working class family that got stuck and didn't know how we were going to get out of the hole that we were in but with the footwork that we put in and got the right resources and found the right people and found bills like this and programs through WorkSource and places like that, such as chance and CSC these people are godsent it's been a lot of people out here that just need a little bit of guidance and understanding and I think that would take our city our state our country to a better place we all just need a little bit more humbled.
Thank you for listening
