

Submitter: Jamey Knapp

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB199

As a beef & cranberry producer I oppose SB 199. Our livelihoods depend on being able to control & prevent the destruction & loss caused by predators. This bill would significantly impact our cranberry & cattle operations negatively, increasing our operating costs and decreasing our production ability. This would create a chain reaction increasing prices for the end consumer. This bill has no positive outcome for anyone, producer or not.

Thank you for your consideration.
