

Submitter: Reta Vining  
On Behalf Of: All  
Committee: House Committee On Rules  
Measure: HB2585

Too many reassigned party selection occurred during renewal of licenses. Our party was lick out to NAV. Your voter rolls do not tell the whole truth of valid addresses, which is viewed according to the SOS a class C felony. This assignment was initially given to the County Clerks, but they were to lazy to clean up the voter rolls, to busy with making plans to corrupt the entire elections process. Known as the unified National county clerks association. Get rid of the ERIC, get rid of DMV registration of voters and out the clerks back to work, ding their job. Get rid of machines in our elections. You will save our tax payers dollars and clean up this mess. Ballots at the address voters used to live at, changing voter party, cost of machines, and let the medical clinics do what they do best, save lives. All entities involved were the wrong solution. It is the clerks duty to do their job. Register voters, design ballots, background check of candidates running for office, that is what their job is. If the clerks were doing their job, there would not be as many FOIA request, vulnerability to cyber security breaches and the life of our nation.
