

Submitter: Carmen Mons

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2996

To whom it may concern,

I am a concerned dental professional and dental patient. I oppose HB2996 because patients should have a trained and certified individual taking radiographs on them. By removing the need for testing and taking a course a dental assistant could have no knowledge of the radiation safety (ALARA). This knowledge is vital for the safety of dental patients. Radiology Health and Safety has been established with the safety of the clinician, as well as the patient.

Thank you for your consideration,
Carmen Mons RDH, CDA, EPP, MS
