

Submitter: Carmen Mons

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3223

To whom it may concern,

I am a concerned dental professional and dental patient. I oppose HB3223 because patients should have a trained and certified individuals completing tasks/procedures on them. By removing the need for testing and taking a course a dental assistant could have no knowledge of the risk and complications a specific procedure holds. This knowledge is vital for the safety of dental patients. Certifications and instruction has been established with the safety of the clinician, as well as the patient.

Thank you for your consideration,
Carmen Mons RDH, CDA, EPP, MS
