

Submitter: Donna Bleiler

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3158

I OPPOSE HB 3158

Crippling farmers with this bill will add to inflation, which you should be trying to mitigate.

The added expense will trickle down through farm operations to increased costs for food.

In 2021, a bill was proposed to convert to renewable diesel, which is environmentally cleaner than electric vehicles and can be run in all diesel engines without clogging and freezing up. But ignorantly, it was rejected in committee. If you are really concerned with environment, why don't you walk the talk?
