

Submitter: Catherine Ellison

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2215

HB 2215 goes against the wishes of the voters of Oregon which were put in place in the past: that unless we can safely store and take care of the dangerous nuclear waste which is produced by operating nuclear power plants, we do NOT want to have these methods of power production in our state!!! To remove the requirement mentioned in this bill defeats so many of our efforts.. Our efforts need to be directed toward renewable power production methods: solar, etc etc. The lessons of the past continue to provide wisdom: what with Trojan, and the leaky eastern Washington storage repository of nuclear waste, and nuclear disasters which have occurred the world over. ...

Please stand with the voters of Oregon and do NOT remove the requirement for safe nuclear waste storage.

And thank you for your service in helping us as a state sort out all these complicated issues.
