

Submitter: Debra Meyer

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

This is nothing more than eugenics. 100 years ago, there was a epidemic of “imbeciles” in which 70,000 undesirable citizens were sterilized under the guise of “settled science”. Planned Parenthood was founded by a Margaret Sanger who advocated for a eugenics approach to breeding for “the gradual suppression, elimination and eventual extinction, of defective stocks — those human weeds which threaten the blooming of the finest flowers of American civilization.”

The Jaffe memo from 50 years ago is a clear demonstration that increasing homosexuality, compulsory education, restructuring of families and promoting sterilization has continued to be their goals. So now they are a massive source of the current push to send the younger generation into a chronic medicalization state that will increase their risk of osteoporosis, cancer and heart disease as well as decrease their ability to sexually function and have children/families.

Modern eugenics wants to chemically castrate, sterilize and mutilate some of our most vulnerable populations. States now want to remove parental consent to sterilization and affirmation. Hippocratic oath clearly states “do no harm”. Protecting vulnerable populations from lifelong misery of drugs, surgeries and the reality that you were born in the right body should be the default. This is government sponsored child abuse and I firmly appose HB 2458.
