

Submitter: Colleen Oneil

On Behalf Of: My family friends and citizens of Oregon

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2215

As a concerned citizen of Oregon, I oppose this bill on the grounds of it being detrimental to the health and well being of all living plants, beings and future generations of such. My question is WHY ? Why is such a proposal even viable enough to make it this far in the legislative process? The people of Oregon stated that no nuclear power plants should be licensed until a licensed federal repository is in place for High Level Radioactive Waste. No licensed federal repository has been approved over all these years. There is no solution to the problem of the disposal of the High Level Radioactive Waste. There's a reason it's classified high level.... It's dangerous! I believe this proposal is financially motivated. The citizens of Oregon don't deserve to be burdened with the potential dangers this proposal would open the doors to. Do the right thing for future generations, oppose this bill.
