

Submitter: k davis

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB545

Please support SB545. No individual should be forced to purchase or use single use containers and generate unnecessary waste. At a time our state needs to accelerate its embrace of zero waste strategies, Oregon has been limiting its residents from reasonable practices enjoyed by citizens nationwide for decades. Plastic waste has been accumulating throughout our environment (and bodies!) at an alarming rate and our laws should not bar individuals from using healthy, sustainable, reusable materials.
