

Submitter: Juliann Toone

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2994

I work with students and families with hearing differences, and this bill would be life changing for many of them. In my experience both in New Jersey and Oregon, the cost of hearing aids for families both with and without insurance is astronomical, and support of this bill could mean that many of my students receive the support they need to be successful. Thank you for your time.
