

Submitter: Kathleen Mulligan

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

I am a parent of a rough and tumble boy who decided at age 15 he is no longer a boy after being cut from a sports team. This was a high school goal of his. This crushing event made him think there was something wrong with him. Gender seemed to answer those questions for him. He believed it because of his ASD/ADHD traits. He was groomed on-line and at school to believe this. He also decided with other friends who also believed they were trans. How is this possible? There is social contagion happening. This many kids could not out of blue decide this. Listen to the testimony of Jamie Reed. <https://www.thefp.com/p/i-thought-i-was-saving-trans-kids>
