On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

Every single accredited medical and psychological institution, foundation, and organization believes that conversion therapy is worthless at best and deadly at worst. Conversion therapy only serves to torture innocent people who have done nothing wrong and are merely not straight or cisgender. These people don't need this torture.

There is no robust evidence to support claims that conversion therapy is effective at changing sexual orientation or gender identity.

This practice is just cruelty for the sake of cruelty, with the side benefit of letting the torturer bill the government for it.

This needs to stop.
