

Submitter: Ami Joshi

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2994

I am writing to express my strong support for HB 2994. Audiology care and equipment should be available to children who need it -- without financial and bureaucratic barriers. Such equipment is life-changing and necessary for the families affected. To those voting on this bill, please consider that you are making a decision that could potentially impact someone you know and care about now or in the future. Wouldn't you want them to have the access to much needed audiology care and equipment so that they could live their best lives? Imagine how devastating it might be to have a child who is in need of life changing support, to be told that solutions are available but that they are *just* out of reach due to financial or policy barriers. Please vote yes on HB 2994. Thank you for your consideration.
