

Submitter: marna herrington

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB530

SB 530 makes sense. It will help increase carbon sequestration of our forests, agricultural lands, and wetlands and improve the resilience of our water, wildlife, and communities. It will also provide incentives and support to forest owners, farmers, and ranchers to implement effective, natural climate solutions. It would be foolish not to implement SB 530.
