

Submitter: John Duggan

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB530

Please consider directing the Board of Forestry to tighten the rules concerning clearcuts, which not only reduce carbon storage but also destroy our biodiversity. Please consider that not all forests in Oregon are the same...e.g., Coast Range vs. Klamath Mountains, Willamette Valley vs. Northeast Oregon. Your direction to the Board of Forestry via this bill will go a long way toward improving carbon storage in our State.
