

Submitter: Eric Canon

On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB2601

My daughter abused drugs and alcohol. I enabled her behavior until I saw my complicity. She lost her driving privileges and went to jail. She is now eleven years clean and sober. Her driving privileges have been restored. She's productive and has resources to control her addictions. I'm very proud. And I learned something.

Her ordeal gave me an understanding of what it is to enable. Enabling is what we do with the fossil fuels industry. We all help them to destroy our earth. All of us must realize our role and stop supporting what they do.

It's about life and death. We have no choice. They will not stop until we demand they stop.

The Oregon legislature needs to stop this madness, this plundering, this destruction of life, this enabling. It's long overdue. Please act like life depends upon it because it does. Stop enabling the fossil fuels industry.
