

Submitter: David Long

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

Bigots without education, who do not read scientific research, should not get to make decisions about children's bodies or their sexuality. Banning conversion therapy for children is a step toward accepting them as they are, and that's a good thing. Why have we not done this already? Why would anyone think conversion therapy is a good thing for any child?
