

Submitter: Norene Gonsiewski

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB530

I live in Sisters, an area that is increasing prone to fire danger from climate change. I live in an area where drought is affecting nearby farms, ranches, wildlife and of course our natural beauty and quality of life. The people of Central Oregon balk at government control because our local politicians tend to represent the developers and industries accelerating climate change. The only way to mitigate the disaster is to legislate and fund the mitigation. Let's do this to help our beautiful and ill state, to rebound. Thank you.
