

Submitter: Paige Holt

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3223

If dental assistants are allowed to get a license to work as a dental assistant this would allow them to work with out knowledge that is important to keep patients and coworkers safe and themselves as well. In my twenty seven years of working in the dental field, and 23 of those years as a dental hygienist I have seen how assistants with out proper knowledge are taken advantage of and learn bad behaviors that affect the safety of all. I highly oppose this bill.
