Re ; HB2396

Hi my name is Nocholyn Paulus. I am a Micronesian junior at Parkrose High School and I'm a part of the Parkrose community . Today I agree with HB2396 , the direct EQC to develop rules for indirect sources of diesel pm emissions.

The reason I agree with this bill is because it's obviously a smart thing to do. The more attention we have on this situation the faster it's going to be solved. I have family that are athletes here at the high school. They usually practice outside on the field , they would be or maybe are inhaling this sick pollution and I also think the people with Asthma in the community would mostly be affected too cus how poor our air is. One fact that I found shocking and quite sad is that my County , Multnomah, is in the worst 2% of countries nationwide for diesel pollution. That just shows how important this bill is because would we like Multnomah to be known as that ? I don't and I know for sure the Parkrose community doesn't want that as well.

Thank you for listening to my testimony
